

NATIONAL DEFENSE BUDGET ESTIMATES FOR FY 1987

This document is prepared and distributed as a convenient reference source for the FY 1987 National Defense budget estimates. It also provides several current and constant dollar historical time series for National Defense, the total federal budget, and the U.S. economy.

**OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
(COMPTROLLER)**

STATISTICAL CHANGES IN THE PRESENTATION OF NATIONAL DEFENSE DATA

CHANGES IN FY 1986 BUDGET {FEBRUARY 1985}

A. OMB TREATMENT

In the presentation of the FY 1986 budget, OMB moved the actual military retired pay cash accounts - both budget authority and outlays - from the DoD Military Functions (051) to the DoD Civil Functions (054). An imputed value for military retired pay accrual was included in the DoD Military Functions (051) in all years. This statistical change provided for a comparable data series, but overstated the historical record of funds appropriated to DoD for military retired pay by \$77.8 billion from FY 1945 through FY 1976, and understated funds appropriated to DoD for military retired pay by \$9.1 billion from FY 1977 through FY 1983.

B. DoD TREATMENT

For the years FY 1945-1983, DoD budget authority shows military retired pay on a cash rather than accrual basis. For the years FY 1984-1991, DOD budget authority reflects accrual cost of military retirement. In outlays, the treatment is the same as in budget authority except military retired pay is on a cash basis through FY 1984. The net difference between the OMB and DoD treatment of military retirement is shown as "OMB redefined" in chapter seven.

CHANGES IN FY 1987 BUDGET {FEBRUARY 1986}

The DoD treatment of military retired pay in the FY 1986 budget is continued in the FY 1987 budget.

The Balanced Budget and Emergency Deficit Control Act of 1985 (P.L. 99-177) affects the presentation of the FY 1987 budget. All the tables in Chapter One provide data for the National Defense Function (050) before and after the effects of sequestration under P.L. 99-177.

All other data in this book reflect reductions in BA and TOA and the associated outlays under P.L. 99-177 except for the Major Force Program data shown in Chapter six.

CHAPTER 1

NATIONAL DEFENSE - AN OVERVIEW

This chapter provides an overview of the National Defense function of the federal budget which includes, in addition to the DoD budget, activities of other Federal Agencies that support our National Defense. Data are provided in three standard classifications: budget authority (BA), total obligational authority (TOA), and outlays as defined below.

Definitions

Budget Authority -- the authority to enter into obligations for payment (outlays) of Government funds. Most BA is provided by Congress in the form of appropriations and reappropriations which can be increased or decreased by transfers to or from another account, and is identified to the year the authority takes effect.

Total Obligational Authority -- TOA is a DoD financial term which expresses the value of the DIRECT Defense program for a fiscal year.

Prior to FY 1979, TOA differed from BA primarily because of:

- (1) Congressional actions directing the transfer of prior year BA balances to finance direct programs (increasing TOA with no effect on BA);
- (2) Application of shelf stock sales receipts to finance direct programs (increasing TOA with no effect on BA); and
- (3) BA lapsing before obligations were incurred (decreasing TOA with no effect on BA).

Beginning in FY 1979, Congressionally-directed transfers of prior year BA balances which have the effect of extending the life of the appropriation are treated as both TOA and BA (The term "Reappropriation" applies when prior year balances are brought forward and the life of these funds is extended).

An additional difference is Net Offsetting and Trust Fund Receipts which are deducted from BA, but have no effect on TOA. These are collections from the public that arise out of the business-type or market-oriented activities of the Government and are deposited in receipt accounts.

The differences between BA & TOA in the FY 1986 and FY 1987 budgets are greater than usual due to the Congressional decision to finance more programs with transfers, particularly in the Military Personnel accounts. The following table provides a reconciliation between BA and TOA for FY 1986 and FY 1987.

Reconciliation between TOA and BA for FY 1986 and FY 1987
 (\$ Thousands)

	<u>FY 1986</u>	<u>FY 1987</u>
Total Obligational Authority (TOA)	296,386,657	312,291,100
Less Financing:		
Unobligated Balance Transfers:		
Military Personnel Pay raise	-1,587,494	-
Retired Pay Reform	-2,900,000	-
O&M Readiness & Foreign Currency	-2,467,712	-
Unprogramed Current Year Funds		
Aircraft Procurement, Air Force T-46	178,900	-
Reimbursable Program		
NATO Infrastructure	-30,000	-20,000
Prior Year Balances & Authority to Borrow		
Homeowners' Assistance	-1,140	2,000
Federal Financing Bank (FFB) Direct Loans:		
Navy Industrial Fund	495,100	-
Defense Production Guarantees	<u>6,000</u>	<u>6,000</u>
Total Financing	-6,306,346	-12,000
Less Receipts:		
Net Offsetting Receipts	-692,180	-720,010
Trust Fund Receipts	23,300	63,700
Interfund Transactions	<u>-20,920</u>	<u>-22,790</u>
Total Receipts	-689,800	-679,100
Total Adjustments (Financing & Receipts)	<u>-6,996,146</u>	<u>-691,100</u>
Budget Authority (BA)	289,390,511	311,600,000
P.L. 99-177	-10,978,188	-
Net Budget Authority (BA)	278,412,323	311,600,000
<u>Outlays</u> -- There is a time lag between budgeting funds (congressional appropriation), signing contracts and placing orders (obligations), receiving goods or services and making payments (liquidating obligations). Payments, termed outlays, lag obligations due to the time required to render services or complete projects. Under full funding, Congress approves, in the year of the request, sufficient funds to complete most procurement and construction programs, even though these projects may require several years to complete. As a result of full funding, and the time required to produce and deliver goods and services, outlays during a fiscal year may be for payment of obligations incurred during prior years as well as the current year. Outlay data reflect these spending patterns and also the changes in program mix over time.		

Budget Summary

Table 1-1 presents the budget request for the National Defense Function in the terms defined previously. The National Defense Budget includes, in addition to the DoD budget, those activities of the Departments of Energy and Treasury, the General Services Administration, Federal Emergency Management Agency, and the Selective Service System which support the National Defense Function. These activities are aggregated in Table 1-1 as DoE and other, and are shown in more detail in later tables. Data are provided in both current and constant FY 1987 prices before and after the effects of sequestration under P. L. 99-177.

Table 1-2 provides the National Defense BA estimate by Act in current prices before and after the effects of sequestration under P. L. 99-177.

Table 1-3 provides the National Defense BA estimate by Act in constant FY 1987 prices before and after the effects of sequestration under P. L. 99-177.

Table 1-4 provides the National Defense Outlays estimate by Act in current prices before and after the effects of sequestration under P. L. 99-177.

Table 1-5 provides the National Defense Outlays estimate by Act in constant FY 1987 prices before and after the effects of sequestration under P. L. 99-177.

Table 1-6 provides a reconciliation from the Defense Appropriation and Military Construction acts to National Defense BA shown in the President's Budget request before and after the effects of sequestration under P. L. 99-177.

Table 1-7 provides BA and Outlays for all functions of the total Federal Budget for fiscal years 1985, 1986, and 1987. The functions are those used in the Budget of the United States which is the source document for Table 1-2.

Table 1-8 provides the Long-Range forecast for the National Defense Function in the same format as Table 1-1.

CHAPTER 2

SUPPLEMENTS, RESCISSIONS, AND CONTINGENCY ESTIMATES

FY 1986 AND FY 1987

Table 2-1 reflects Budget Authority for supplementals for FY 1986, reductions made pursuant to P.L. 99-177 for FY 1986, and contingency estimates for the National Defense function in FY 1987. The defense-related activities are identified by the other appropriation acts in which they are included. The contingency estimate represents pay raises for military and civilian personnel in DoD, and proposed legislation to support several military pay and benefit initiatives submitted with this budget.

Table 2-2 reflects the Outlay impact of the FY 1986 supplemental, the FY 1986 reductions made pursuant to P.L. 99-177, and the FY 1987 contingency estimate.

Table 2-3 is a summary of the total Department of Defense budget estimates for FY 1987 as reflected in the February 1986 President's Budget submission to Congress. The estimates are identified by the Defense Appropriation Act and the Military Construction/Family Housing Act.

CHAPTER 3

LEGISLATIVE AUTHORIZATIONS

Almost all National Defense activities are within the legislative purview of the Armed Services Committees of the House and Senate. Practically all National Defense budget authority is subject to the annual appropriation process. The Department of Defense accounts for 97% of the National Defense function, and the Defense Appropriation Act itself is 93% of the total National Defense that is subject to appropriation. The remainder of the estimates is scattered under several headings.

Table 3-1 presents the National Defense estimates for those accounts requiring annual legislative authorizations, and those that do not. As shown, \$243 billion is subject to specific annual authorization of the amounts to be appropriated. Another \$74 billion is covered by the annual authorization process through the authorization of military strengths, but the appropriation dollar amounts are not specified in authorization legislation.

Table 3-2 presents a summary of the authorizations enacted for FY 1984 through FY 1986, and the FY 1987 DoD authorization request.

Table 3-3 presents a summary of personnel authorizations enacted for FY 1984 through FY 1986, and the current FY 1987 request for DoD. As noted on the table, reserve military forces are shown as end strength in FY 1987 per Congressional direction.

Table 3-4 presents budget authority for items covered by the Defense Authorization Bill. The FY 1985 and FY 1986 columns show amounts authorized and appropriated. The FY 1987 columns show the request now pending.

Table 3-5 presents a reconciliation of amounts authorized to the total Department of Defense budget estimates for FY 1987. Explanations are included on the table.

- b/ Authorized for appropriation in prior years but not funded.
- c/ Military end strengths are authorized but not amounts.
- d/ Proposed legislative pay and benefit initiatives are authorized but not amounts.

CHAPTER 4 CHRONOLOGIES

The matter of chronologies has assumed much greater importance because of the scorekeeping provisions of the Congressional Budget and Impoundment Act.

Table 4-1 provides a chronology of National Defense budget authority for FY 1985, beginning with the February 1984 estimate. Congressional actions, supplemental requests, and other changes in calendar year 1984 are shown to arrive at the FY 1985 column of the FY 1986 budget. Congressional and other changes in calendar year 1985 are shown to arrive at the final FY 1985 column of the FY 1987 budget.

Table 4-2 provides the same chronology for FY 1985 outlays.

Table 4-3 provides a chronology of National Defense budget authority for FY 1986, beginning with the February 1984 estimates and moving through congressional action, supplemental requests, and other changes in calendar year 1985, to arrive at the FY 1986 pre-sequestration estimate. Then, P.L. 99-177 changes, and the FY 1986 column of the FY 1987 budget are also shown.

Table 4-4 provides the same chronology for FY 1986 outlays.

Table 4-5 provides a detailed chronology of Department of Defense Total Obligational Authority (TOA), Budget Authority (BA), Appropriations and Outlays for the FY 1985 budget estimates.

Table 4-6 provides comparable data for FY 1986.

Table 4-7 provides the initial budget estimates for FY 1987.

CHAPTER 5

PAY RAISES - PRICE INCREASES - AND

TREATMENT OF INFLATION

I. INTRODUCTION

Accurate measurement of historical inflation and improved forecasting techniques are critical to the integrity of defense programs. DoD's management of inflation is designed to protect this integrity by properly programming for inflation.

Inflationary pressure applies to all sectors of the economy and all federal programs - particularly DoD because of the high percentage of our programs which have long production lead times. Budgets weighted toward salaries and personnel expenses, with costs pegged to private sector comparability scales, are more controllable.

Full funding, providing for anticipated future inflation "up front," rather than on a year-to-year basis, makes assumptions about future inflation particularly important for the defense budget. If the initial assumptions about future inflation are too low, either the Defense Department must request more funds or buy less. Program stretchouts increase costs because of greater exposure to inflation. To maintain program schedules, reductions are usually made in spares, support, testing, and training, which reduces our readiness posture.

Data collected by the Department of Commerce show that defense price experience over the past decade has been generally higher in major weapons than price increases recorded in the general economy. Since the FY 1983 budget, our estimate of inflation for the major procurement accounts has been based on a 1.3 multiple of the GNP deflator. Budgeting acquisition programs to most likely cost allows the Congress and others to see in advance what the fully funded costs will be and is an important component of improved acquisition management. This Administration's success in reducing inflation is now reflected in major weapons, as the FY 1987 budget contains no special premium for these accounts. The Department will continue to budget to most likely cost, and recognizes that it may be necessary to use a factor other than the GNP for major weapons.

This chapter describes adjustments made to DoD funding estimates for the effects of inflation, contains definitions and explains some of the key terms and concepts involved in measuring inflation.

II. CONCEPTS

Inflation is defined as an increase in the general level of prices in the economy. Inflation does not mean that prices rise

evenly or that all prices are rising. Some prices may be constant and others actually may be falling. Prices of some commodities rise faster than others due to differences in the magnitude and direction of changes in supply and demand in various markets.

While inflation rates are developed in terms of outlays (expenditures), price estimates for the budget must be developed in terms of BA. In order to properly adjust price estimates for the effects of inflation, it is necessary to understand the relationship of outlays to BA.

Both outlays and BA are expressed in terms of a fiscal year. However, the term fiscal year used with outlays has a different meaning than it does used with BA.

For outlays, the fiscal year indicates the time period in which the outlays were incurred. All outlays designated by a fiscal year occur during that single fiscal year. The outlays in a given fiscal year consist of amounts of BA available from that year and previous years.

For BA, the fiscal year indicates the time period in which the BA is first available for obligation and expenditure. While budget authority could be spent in that first year, it is normally expended over a period of several years. BA for a given year appears as an outlay in that year and in subsequent years as work is performed and costs are incurred. About 65 percent of FY 1987 BA will expend in FY 1988 and beyond.

The adjustment of price estimates to accommodate the impact of inflation is a complex operation which requires that the analyst understand the concept of inflation, the relationship between BA and outlays, and the mathematics involved in manipulating and applying indices. The methodology to be followed varies for each price estimate depending upon the specific information available for that estimate. There are no simple "cookbook" rules or procedures which can be followed.

Any application of inflation estimates, whether for pricing or constant dollar analyses of real program levels, implicitly contains a large number of assumptions, many of which may not be valid for specific applications. The concepts of inflation, constant dollars, and real program growth are somewhat limited. The value and popularity of these concepts, however, stem from their simplicity, as they can provide a relatively easy way to understand the significance of the total DoD budget, or to measure an increase in areas like O&M. The danger of oversimplification or misuse of these concepts requires those who use them to understand fully these limitations.

Many limitations are inherent in the use of any index. Inflation rates and outlay rates are average numbers which, while relatively accurate in the aggregate, are almost never

accurate in specific applications. For example, an average of the increases in food prices would not imply that every item in the grocery store increased by that rate. The selection of a base year is arbitrary, and comparisons to a base year are only valid to the extent that the mix of programs in the years being compared is similar to the mix in the base year. Finally, the approved inflation rate is itself only a forecast, subject to wide variations of accuracy, especially in the more distant future.

The calculation of real program growth is limited in that it separates all dollars into only two categories - inflationary and real program changes. It does not measure changes in efficient or effective use of funds. A price increase due to inefficiency is treated as a "real" program increase while, conversely, a price decrease due to an improvement in productivity is treated as a "real" program decrease. In both cases, of course, the "real" program does not change. This concept is only one way of measuring real program changes. Other measures, such as the number of ships or aircraft being procured or operated are often a more appropriate measure of real program.

III. ADMINISTRATION RATES

As a framework for building the President's annual budget and the five year forecast [POM], OMB develops the overall economic posture and a direction for the programs of the Administration. This posture considers overall economic goals such as reducing budget deficits in terms of tax policies, borrowing plans, receipts and outlays, and public debt management. Implicit and explicit assumptions are made as to the rate of inflation, unemployment rates, interest rates, productivity goals, and the GNP. National program priorities are balanced and program goals are defined as well as such specifics as the total number of federal employees. From these assumptions, OMB provides pricing guidance for all agencies to use in developing their budgets based on forecast changes in the GNP deflator. These inflation rates provide the link between the Administration's macro-economic forecast and the specific pricing contained in budget estimates.

IV. DOD APPLICATION

Normally, pricing guidance is provided to the Military Departments and Defense Agencies in late December or early January each year.

Budget Authority for military and civilian compensation is priced in constant dollars using the rates prevailing in January of the year in which the budget is prepared. Funding for all projected civilian pay raises is held in a DoD undistributed contingency account. The funding requirements are scored in the

total Topline but not distributed to the Military Departments until the pay raise is approved by the Congress. The general agreement with OMB is that when pay assumptions change the funding requirements are recalculated and the Topline is increased or decreased accordingly.

The pricing guidance also includes instructions with respect to purchases inflation, or the nonpay portion of the DoD budget. Escalation adjustments will reflect anticipated changes in future prices based on inflation rates approved by OMB and distributed by ASD(C) memorandum annually in January. In projecting price escalation, the total impact of price escalation over the spendout period of a given BA item should be included.

Pay and price assumptions to be used in the development of the POM include projected rates for:

- military and civilian pay
- fuel
- major weapon systems
- all other purchases

If the projected pay and purchase inflation estimates were always accurate, there would be no need to reprice the DoD budget. Such is not the case and the budget must be repriced frequently to keep pace with changing economic conditions. Changes in inflation or pay rates in the current year or budget year have an annualized effect on the outyears as well as rate changes in those years. Pricing adjustments are a normal action during the budget review.

The budget data are adjusted to remove the effect of inflation (pay and price increases) and real growth is calculated from the resultant constant dollar budget data.

The method used by DoD is consistent with the methodology used by the Department of Commerce to measure growth in the public and private sectors of the economy. Pay increases and inflation do not contribute to more defense effort but are rather prerequisites before any growth is accomplished. The DoD conventional, and widely accepted method of calculating constant dollars and real growth is to treat pay raises as inflation. Thus, only increases in military and civilian strength are counted as growth in the personnel sector of the budget.

V. Repricing Example

The Air Force aircraft procurement account has been selected to demonstrate the pricing of an FY 1988 program that cost \$100 in FY 1987 given the following assumptions:

Assumption

<u>FY</u>	<u>% Annual Inflation</u>	<u>Spendout Rate</u>
1988	3.9 %	First year 7.22%
1989	3.4 %	Second year 36.10%
1990	2.9 %	Third year 28.88%
1991	2.3 %	Fourth year 14.44%
1992	2.3 %	Fifth year 13.36%

Step 1 (Create an outlays index as follows:)

$$1987 = 100.0$$

$$1988 = 100.0 \times 1.039 = 103.9$$

$$1989 = 100.0 \times 1.039 \times 1.034 = 107.43$$

$$1990 = 100.0 \times 1.039 \times 1.034 \times 1.029 = 110.55$$

$$1991 = 100.0 \times 1.039 \times 1.034 \times 1.029 \times 1.023 = 113.09$$

$$1992 = 100.0 \times 1.039 \times 1.034 \times 1.029 \times 1.023 \times 1.023 = 115.69$$

Step 2 Calculate incremental costs of FY 1988 aircraft program by multiplying outlays index (inflation by corresponding spendout rate):

1988	103.90	x	.0722	=	7.50
1989	107.43	x	.3610	=	38.78
1990	110.55	x	.2888	=	31.93
1991	113.09	x	.1444	=	16.33
1992	115.69	x	.1336	=	<u>15.46</u>
Total Escalated Cost					110.00

Thus a program that cost \$100 in FY 1987 would cost \$110.00 in FY 1988.

Revised Assumption

The annual inflation rates assumed above are revised as follows:

<u>FY</u>	<u>Spendout rate</u>
1988	3.0% (no change)
1989	3.0%
1990	2.0%
1991	2.0%
1992	2.0%

Step 3 (Create a new outlays index as in Step 1)

1987	100.00
1988	103.00
1989	106.09
1990	108.21
1991	110.38
1992	112.58

Step 4 (Recalculate incremental cost of 87 program as in Step 2)

1988	7.44
1989	38.30
1990	31.25
1991	15.94
1992	<u>15.04</u>
	107.97

Thus the FY 1988 program under these revised assumptions would cost \$107.97, a reduction of \$2.03 (\$110.00 - \$107.97).

VI. Definitions

1. Inflation

Inflation is an increase in the general level of prices in the economy. Inflation does not mean that prices rise evenly or that all prices are rising. Some prices may be constant and others actually may be falling. Prices of some commodities rise faster than others because of differences in the magnitude and direction of changes in supply and demand in various markets. There are many different measures of inflation:

a. GNP Implicit Price Deflator

The **Gross National Product** (GNP) implicit price deflator, generally regarded as the best single measure of broad price movements in the economy, is the ratio of GNP in current prices to GNP in constant prices.

b. Consumer Price Index

The **Consumer Price Index** (CPI) measures the average change in the prices of a fixed list of goods and services purchased by families and individuals in urban areas across the country. Although it is often called the "Cost-of-Living Index" it measures only price changes, just one of several factors affecting living costs.

c. DoD Purchase Index

The **DoD Purchase Index** developed by OASD(C) consists of outyear projections based upon fiscal guidance from OMB linked to actual DoD purchase price experience calculated by the Commerce Department's Bureau of Economic Analysis (BEA).

2. Base Year

The **Base Year** is a point of reference representing a fixed price level, and is expressed as 1.00 (e.g., FY 1987 = 1.00). The base year for a set of index numbers can be changed to another year by dividing each index number by the index for the desired base year.

3. Aggregate Price

The **Aggregate Price** is a weighted average of individual prices, where each price is weighted by an item's contribution to total expenditures. The aggregate price is thus a notional price developed to measure changes in inflation and is greatly affected by the relative mix of the items considered, and the change of that mix over time.

4. Annual Rate of Change in Prices

The **Annual Rate of Change** measures the year-to-year change in prices, computed by dividing one year's aggregate price by the preceding year's aggregate price.

5. Index

The **Index** is a time series which measures the change in prices from a fixed point in time, and is calculated by setting the base year equal to one, and then multiplying the index value of each year by one plus the annual rate of change of the next year.

6. Current Dollars

An item or service is priced in **Current Dollars** if the prices contain all inflationary increases expected to occur in a program over the duration of the spendout of an appropriation. Current dollars are also called "then year" dollars, "budget" dollars or "fully inflated" dollars.

7. Constant Dollars

Constant Dollars measure the value of purchased goods and services at price levels which are same as the base or reference year. Constant dollars do not contain any adjustments for inflationary changes that have occurred or are forecast to occur outside the base year.

8. Real Growth

Real Program Growth - the year-to-year change in constant dollars - is usually expressed as a percentage, and is computed by dividing the constant dollars for one year by the constant dollars of the previous year and subtracting one. Real growth always implies a relationship between two or more time periods.

9. Spendout Rates

Spendout Rates (also called outlay or expenditure rates) are the expected cash flow for a given appropriation expressed as the percent expected to be spent in a given year. These rates are appropriation unique and range from two years in the pay accounts to as much as ten years in ship construction.

10. Outlays Index

An **Outlay Index** measures the impact of changes in inflation on outlays; is used to convert outlays from current to constant dollars; is used to compute the amount of inflation to be added to a base price; and is used to reprice estimates when inflation

assumptions are revised. An index for outlays is calculated by compounding annual rates from any base year.

11. TOA Index

A TOA Index measures the impact of changes in inflation on TOA, given a specific fiscal year and phasing of work performed (or outlays), and is usually developed using the standard outlay rates for an appropriation. The TOA index measures the budgeted change of inflation from a fixed point.

VII. TABLES

Table 5-1 Provides inflation indices for the principal economy-wide measures from 1945-1991, in base year FY 1987=100. These indices are provided for a comparison of DoD inflation with inflation in the general economy.

Table 5-2 Provides pay and inflation rate assumptions used in the FY 1987 budget for DoD outlays. The FY 1985 rates are actual rates based on calculations by the BEA, and the rates for FY 1986-1991 are based on OMB guidance projected at the GNP rate. Fuel rates are projected separately and inflation for all other purchases is estimated in line with the GNP deflator.

Table 5-3 Provides pay and inflation assumptions used in the FY 1987 budget for DoD BA. The pay raises are annual rates and the same as table 5-2. The purchases rates are based on annual outlay rates in Table 5-2 and converted to BA using the spendout profiles from the FY 1987-1991 PPI.

Table 5-4 Provides inflation indices in base year FY 1987=100 for each DoD appropriation title to be used in converting TOA from current to constant FY 1987 dollars.

Table 5-5 Provides inflation indices in base year FY 1987=100 to be used in converting pay and purchases TOA from current to constant FY 1987 dollars.

Table 5-6 Provides inflation indices in base year FY 1987=100 for each DoD appropriation title to be used in converting BA from current to constant FY 1987 dollars.

Table 5-7 Provides inflation indices in base year FY 1987=100 to be used in converting pay and purchases BA from current to constant FY 1987 dollars.

Table 5-8 Provides inflation indices in base year FY 1987=100 for each DoD appropriation title to be used in converting outlays from current to constant FY 1987 dollars.

Table 5-9 Provides inflation indices in base year FY 1987=100 to be used in converting pay and purchases outlays from current to constant FY 1987 dollars.

Table 5-10 Provides military and civilian [general schedule] pay increases from 1945 to the pay raises assumed in the FY 1987 budget request.

Table 5-11 Provides a chronology of inflation estimates since February 1975. This table shows that the estimated inflation rate for a given year may be revised many times before it becomes actual.

Table 5-12 Provides outlay rates to be used in developing outyear inflation factors for projecting future costs. These rates differ from those used to forecast outlay estimates from BA in that they do not allow for lapses in the accounts and they only reflect the purchases spending profile, excluding fuel whereas rates used to estimate outlays from BA levels reflect spending patterns of the total account, including pay and fuel. These rates are also provided in the PPI for developing the FY 1988-1992 POM.

Table 5-13 Provides pay indices in base year FY 1987=100 for each component of civilian pay in DoD. Separate rates are maintained for general schedule [GS], wage board [WB], direct hire foreign national [DHFN], and indirect hire of foreign national [IHFN].

CHAPTER 6

TOA, B/A, AND OUTLAY TRENDS AND PROGRAM CHANGES

Table 6-1 through Table 6-5 and Table 6-8 through Table 6-13 are historical series and provide summaries typically used in analyzing trends in defense programs.

Table 6-1 provides an historical TOA summary by appropriation title, from FY 1949-1987 in both current and constant FY 1987 dollars.

Table 6-2 provides a TOA summary of pay, non-pay operations, and investment costs in both current and constant FY 1987 dollars. This summary is especially useful since the investment program and the non-pay operations are identified on separate lines.

Table 6-3 provides a component TOA summary in both current and constant FY 1987 dollars. The Defense-wide total includes those items in the budget not identified to a specific component such as Retired Pay, Defense (until FY 1984); Contingencies, Defense; and Claims, Defense. Beginning in FY 1983, Family Housing costs are allocated to the Military Departments, and in FY 1985, the military retired pay costs were budgeted by the Services in their Military Personnel accounts.

Table 6-4 provides TOA by the major force programs in current dollars.

Table 6-5 provides TOA by the major force programs in constant FY 1987 dollars.

Table 6-6 provides appropriation summaries in current dollars for TOA, BA and outlays.

Table 6-7 provides appropriation summaries in constant FY 1987 dollars for TOA, BA and outlays.

Table 6-8 provides an historical Budget Authority summary by appropriation title, from FY 1949-1987 in both current and constant FY 1987 dollars.

Table 6-9 provides a Budget Authority summary of pay, non-pay operations, and investment costs in both current and constant FY 1987 dollars.

Table 6-10 provides a component Budget Authority summary in both current and constant FY 1987 dollars.

Table 6-11 provides an historical Outlay summary by appropriation title, from FY 1949-1987 in both current and constant FY 1987 dollars.

Table 6-12 provides an Outlay summary of pay, non-pay operations, and investment costs in both current and constant FY 1987 dollars.

Table 6-13 provides a component Outlay summary in both current and constant FY 1987 dollars.

Table 6-14 provides the estimate of DoD Civilian pay in current dollars.

Table 6-15 provides the estimate of DoD Civilian pay in constant FY 1987 dollars.

CHAPTER 7

DEFENSE, THE PUBLIC SECTOR, AND THE ECONOMY

The Military Functions (DoD) component of National Defense has not been adjusted in Tables 7-1 and 7-2 prior to FY 1985 for the conceptual change in military retirement. DoD data from FY 1945 through FY 1984 are actual outlays to military retirees, while outlays in FY 1985 and later are payments for the estimated accrual costs of the current military force. The net difference between the OMB and DoD treatment of military retirement is shown as "OMB redefined" in Tables 7-1 and 7-2.

Table 7-1 provides total Federal outlays from FY 1945-1987, grouped under: National Defense, with a separate figure for DoD; Veterans, Space and International Programs; Net Interest; and Social and Economic programs, which includes General Science and Technology (excluding the space program); Natural Resources and Environment; Energy; Agriculture; Commerce and Housing Credit; Transportation; Community and Regional Development; Education, Training, Employment and Social Services; Health; Income Security; Administration of Justice; General Government; Revenue Sharing and general purpose fiscal assistance.

Table 7-2 provides these data in constant FY 1982 prices.

Table 7-3 provides a breakdown of net U.S. public spending by federal, state, and local components from FY 1945-1987. This excludes government enterprises (such as the postal service, utilities, and liquor stores) except for any support these activities receive from tax funds.

Table 7-4 provides these data in constant FY 1982 prices.

Table 7-5 provides Gross National Product (GNP) for fiscal years 1947 through 1987 in current and constant FY 1982 dollars. The table provides a breakdown of GNP under these headings: National Defense, Other Federal, State and Local, and All Other. Data are on a National Income Accounts (NIA) basis. Also shown are percentage distributions of the NIA by fiscal years.

Table 7-6 provides DoD employment (military and civil service by component and industry employment) for the years 1940-87.

Table 7-7 provides U.S. employment and labor force data for 1940-87.

Table 7-8 is a master percentage table which provides DoD and national defense spending as a percentage of various economic and budgetary aggregates. Included are: DoD and national defense outlays as a percentage of the Federal Budget and of net public spending; DoD employment as a percentage of public employment and the total labor force; and the defense share of GNP on a budget basis.

a/ Air Force civil service employment figures are not available separately prior to 1948. They are included in the Army figures for the earlier years.

b/ Civil service figures for 1953 and later years include foreign indirect hire employees.

c/ Navy reserve personnel on active duty for Training and Administration of Reserves (TARS) are included in the active Navy prior to FY 1980. From FY 1980 on, they are included in the Full-Time Guard and Reserve.
